---

I received an e-mail from Kathy Gibson last week that EPA is going to extend the IAG for one year. In January, EPA and the USGS will continue negotiations on the IAG.

I haven't heard anything from our region at all on this at this point. However, it does look like we know the IAG will extend into the next CY, so that helps with some of the projects that we thought had to be completed by the end of the CY or the funding would be gone.

I will keep you posted of any additional changes to the IAG as they become available.

Thanks.
